United States

From Wikipedia, the free encyclopedia
(Redirected from [The United States of America](#))

The **United States of America** (USA), commonly known as the **United States (U.S.) or America**, is a federal republic composed of 50 states, a federal district, five major self-governing territories, and various possessions.^{[6][8]} At 3.8 million square miles (9.8 million km²), the United States is the world's third- or fourth-largest country by total area^{[6][7]} and just fractionally smaller than the entire continent of Europe's 3.9 million square miles. With a population of over 325 million people, the U.S. is the third-most populous country. The capital is Washington, D.C., and the largest city by population is New York City. Forty-eight states and the capital's federal district are contiguous in North America between Canada and Mexico. The State of Alaska is in the northwest corner of North America, bordered by Canada to the east and across the Bering Strait from Russia to the west. The State of Hawaii is an archipelago in the mid-Pacific Ocean. The U.S. territories are scattered about the Pacific Ocean and the Caribbean Sea, stretching across nine official time zones. The extremely diverse geography, climate, and wildlife of the United States make it one of the world's 17 megadiverse countries.^[19]

Paleo-Indians migrated from Siberia to the North American mainland at least 15,000 years ago.^[20] European colonization began in the 16th century. The United States emerged from the thirteen British colonies established along the East Coast. Numerous disputes between Great Britain and the colonies following the French and Indian War led to the American Revolution, which began in 1775, and the subsequent Declaration of Independence in 1776. The war ended in 1783 with the United States becoming the first country to gain independence from a European power.^[21] The current constitution was adopted in 1788, with the first ten amendments, collectively named the Bill of Rights, being ratified in 1791 to guarantee many fundamental civil liberties. The United States embarked on a vigorous expansion across North America throughout the 19th century, acquiring new territories,^[22] displacing Native American tribes, and gradually admitting new states until it spanned the continent by 1848.^[22] During the second half of the 19th century, the Civil War led to the abolition of slavery.^{[23][24]} By the end of the century, the United States had extended into the Pacific Ocean,^[25] and its economy, driven in large part by the Industrial Revolution, began to soar.^[26] The Spanish–American War and World War I confirmed the country's status as a global military power. The United States emerged from World War II as a global superpower, the first country to develop nuclear weapons, the only country to use them in warfare, and a permanent member of the United Nations Security Council. During the Cold War, the United States and the Soviet Union competed in the Space Race, culminating with the 1969 moon landing. The end of the Cold War and the collapse of the Soviet Union in 1991 left the United States as the world's sole superpower.^[27] The United States is the world's oldest surviving federation. It is a representative democracy, "in which majority rule is tempered by minority rights protected by law".^[28]

The United States is a founding member of the United Nations, World Bank, International Monetary Fund, Organization of American States (OAS), and other international organizations. The United States is a highly developed country, with the world's largest economy by nominal GDP and second-largest economy by PPP, accounting for approximately a quarter of global GDP.^[29] The U.S. economy is largely post-industrial, characterized by the dominance of services and knowledge-based activities, although the manufacturing sector remains the second-largest in the world.^[30] The United States is the world's largest importer and the second largest exporter of goods.^{[31][32]} Though its population is only 4.3% of the world total,^[33] the U.S. holds 33.4% of the total wealth in the world, the largest share of global wealth concentrated in a single country.^[34] The United States ranks among the highest nations in several measures of socioeconomic performance, including average wage,^[35] human development, per capita GDP, and productivity per person.^[36] The U.S. is the foremost military power in the world, making up a third of global military spending,^[37] and is a leading political, cultural, and scientific force internationally.^[38]

Clicking on “UN” will display UN’s United States of America information

A screenshot of a web browser window. The address bar shows the URL "data.un.org/en/iso/us.html". The page title is "United States of America". The content area lists several categories with grey right-pointing arrow icons: "General Information", "Economic indicators", "Major trading partners", "Social indicators", and "Environment and infrastructure indicators".

- ▶ General Information
- ▶ Economic indicators
- ▶ Major trading partners
- ▶ Social indicators
- ▶ Environment and infrastructure indicators

Clicking on the “Weather” link will display the US Capital weather (If API purchased, this can be internally displayed)

The screenshot shows a web browser window with the title bar "World Dashboard: SVG V" and "Weather for Washington". The address bar displays "Secure | https://www.timeanddate.com/weather/usa/washington-dc". Below the address bar, there's a bookmarks bar with "Apps" and "Other bookmarks".

The main content area is the "timeanddate.com" website. At the top, there's a banner for the "2018 DODGE CHARGER" with the tagline "Designed to provide powerful protection". Below the banner, the navigation menu includes "Home", "World Clock", "Time Zones", "Calendar", "Weather", "Sun & Moon", "Timers", "Calculators", "Apps & API", "Free Fun", and social media links for Facebook, Twitter, Google+, and a search icon.

The main heading is "Weather in Washington DC, USA". On the left, it shows the current weather: "Now 76 °F Mostly cloudy." with a sun and clouds icon. To the right, it lists location details: "Reagan National Airport", "Current Time: Aug 21, 2018 at 9:03:21 am", "Latest Report: Aug 21, 2018 at 8:12 am", "Visibility: 10 mi", "Pressure: 30.03 °Hg", "Humidity: 82%", and "Dew Point: 70 °F". A map of the United States highlights Washington DC with a pin.

Below the weather summary, there's a search bar with "Place or country..." and a "Search" button. Navigation tabs include "Time/General", "Weather", "Time Zone", "DST Changes", "Sun & Moon", "Weather Today/Tomorrow" (which is selected), "Hour-by-Hour Forecast", "14 Day Forecast", "Yesterday/Past Weather", and "Climate (Averages)".

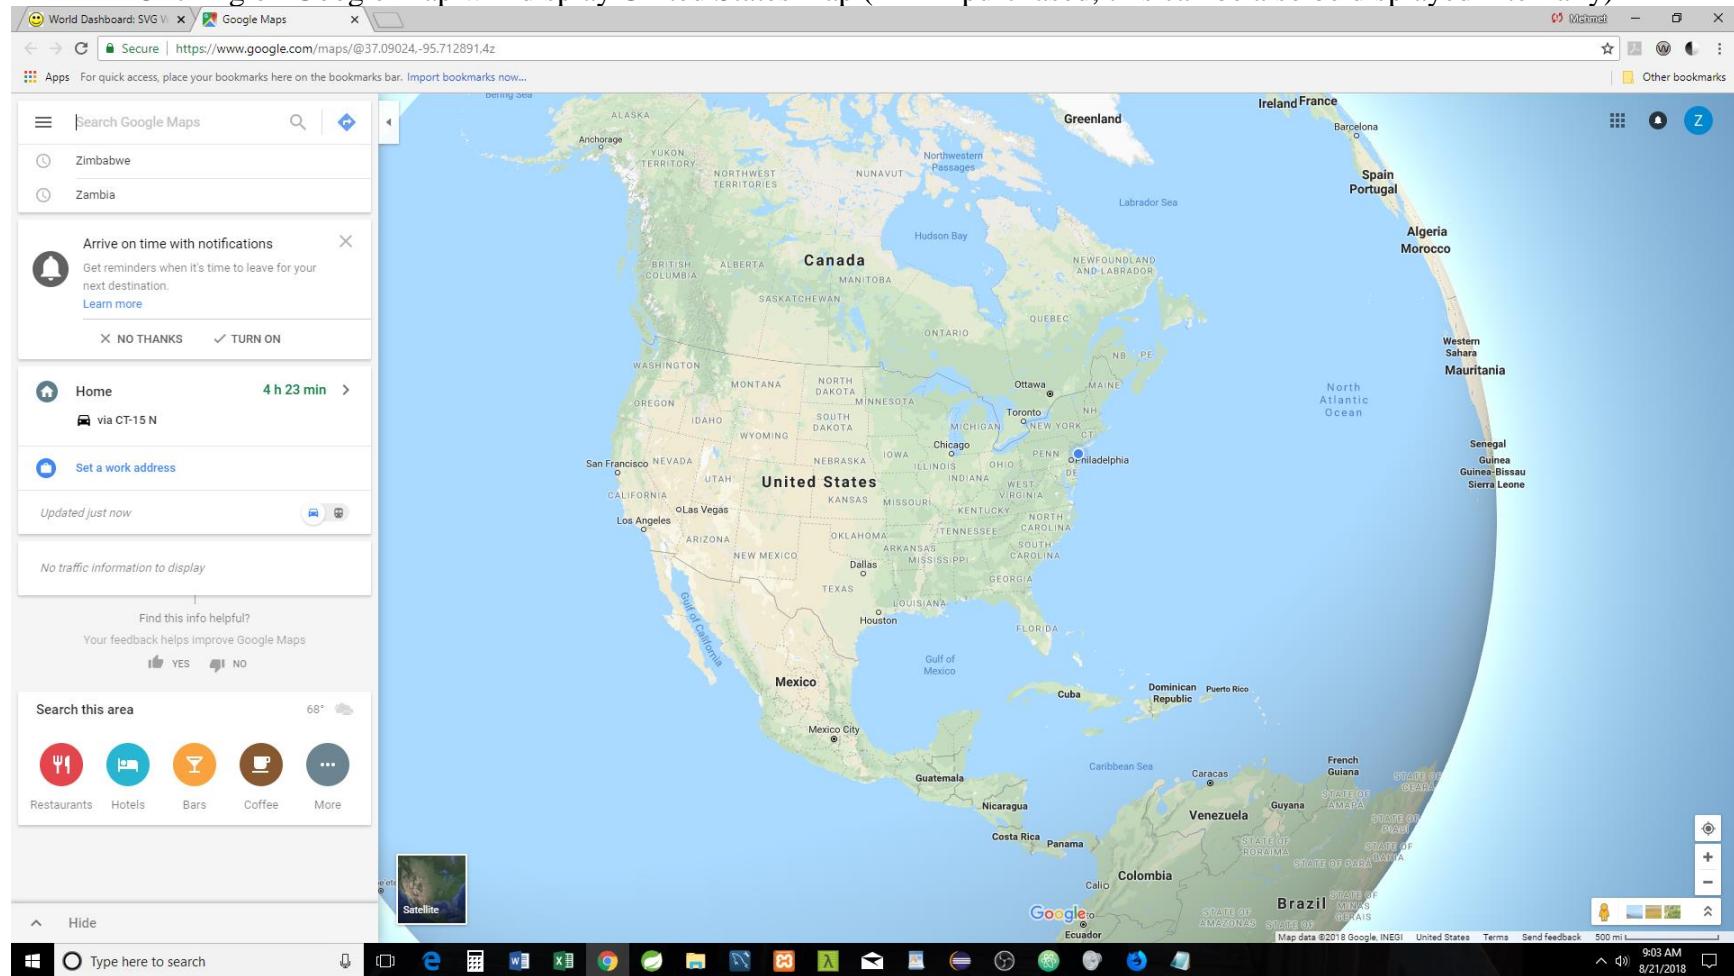

The "Upcoming 5 hours" section shows a timeline from "Now" to "2:00 pm" with icons for sun, clouds, rain, and lightning. Temperatures are listed as 76 °F, 76 °F, 78 °F, 80 °F, 82 °F, and 82 °F respectively. An advertisement for "UPack" shows two moving containers and the text "Moving? Let us drive. No Fuel to Buy. No Truck to Drive. Move virtually anywhere in the US in 2-5 Business Days!".

At the bottom of the browser window, the taskbar shows various pinned apps: File Explorer, Edge, Word, Excel, Google Chrome, Mail, Photos, OneDrive, and others. The system tray shows the date and time as "8/21/2018 9:03 AM".

Clicking on the “Date & Time” link will display the US Capital Date & Time (If API purchased, this can be internally displayed)

The screenshot shows a Microsoft Edge browser window displaying the [timeanddate.com](https://www.timeanddate.com/worldclock/usa/washington-dc) website. The main content area is titled "Current Local Time in Washington DC, USA". It features a large digital clock showing "9:03:35 am EDT" and the date "Tuesday, August 21, 2018". To the right of the clock, there is detailed location information: Country (United States), Federal District (District of Columbia (DC)), Lat/Long (38°54'N / 77°02'W), Currency (United States Dollar (USD)), Languages (English), and Dial Codes (+1 - See how to dial). Below this information is a map of the United States with a black dot indicating Washington DC's location. At the bottom of the main content area, there are links for "Place or country..." and a search button. A navigation bar above the main content includes links for Home, World Clock, Time Zones, Calendar, Weather, Sun & Moon, Timers, Calculators, Apps & API, Free Fun, and a user profile icon. The Windows taskbar at the bottom shows the weather as "76 °F" and various pinned application icons.

Clicking on Google Map will display United States map (If API purchased, this can be also be displayed internally)

Washington, D.C.

From Wikipedia, the free encyclopedia

This article is about the capital of the United States. For the state on the U.S. West Coast, see [Washington \(state\)](#). For other uses, see [United States capital \(disambiguation\)](#), [Washington \(disambiguation\)](#), and [Columbia District](#).

Washington, D.C., formally the **District of Columbia** and commonly referred to as **Washington** or **D.C.**, is the **capital of the United States of America**.^[4] Founded after the American Revolution as the seat of government of the newly independent country, Washington was named after George Washington, first President of the United States and Founding Father.^[5] Washington is the principal city of the [Washington metropolitan area](#), which has a population of 6,131,977.^[6] As the seat of the [United States federal government](#) and several international organizations, the city is an important world political capital.^[7] Washington is one of the most visited cities in the world, with more than 20 million annual tourists.^{[8][9]}

The signing of the [Residence Act](#) on July 16, 1790, approved the creation of a [capital district](#) located along the [Potomac River](#) on the country's [East Coast](#). The [U.S. Constitution](#) provided for a [federal district](#) under the exclusive jurisdiction of the Congress and the District is therefore not a part of any state. The states of [Maryland](#) and [Virginia](#) each donated land to form the federal district, which included the pre-existing settlements of [Georgetown](#) and [Alexandria](#). Named in honor of President [George Washington](#), the City of Washington was founded in 1791 to serve as the new national capital. In 1846, Congress returned the land originally ceded by [Virginia](#); in 1871, it created a single [municipal government](#) for the remaining portion of the District.

Washington had an estimated population of 693,972 as of July 2017, making it the [20th largest American city](#) by population. Commuters from the surrounding Maryland and Virginia suburbs raise the city's daytime population to more than one million during the workweek. The [Washington metropolitan area](#), of which the District is the [principal city](#), has a population of over 6 million, the [sixth-largest metropolitan statistical area](#) in the country.

All three branches of the [U.S. federal government](#) are centered in the District: [U.S. Congress](#) (legislative), [President](#) (executive), and the [U.S. Supreme Court](#) (judicial). Washington is home to many national monuments and museums, which are primarily situated on or around the [National Mall](#). The city hosts [177 foreign embassies](#) as well as the headquarters of many international organizations, trade unions, non-profit, lobbying groups, and professional associations, including the [Organization of American States](#), [AARP](#), the [National Geographic Society](#), the [Human Rights Campaign](#), the [International Finance Corporation](#), and the [American Red Cross](#).

A locally elected [mayor](#) and a 13-member council have governed the District since 1973. However, Congress maintains supreme authority over the city and may overturn local laws. D.C. residents elect a [non-voting, at-large congressional delegate](#) to the [House of Representatives](#), but the District has no representation in the [Senate](#). The District receives three [electoral votes](#) in presidential elections as permitted by the [Twenty-third Amendment](#) to the [United States Constitution](#), ratified in 1961.

Florida

From Wikipedia, the free encyclopedia

This article is about the U.S. state of Florida. For other uses, see [Florida \(disambiguation\)](#).

Florida ([/flɔːrɪdə/](#)) is the southernmost contiguous state in the United States. The state is bordered to the west by the Gulf of Mexico, to the northwest by [Alabama](#), to the north by [Georgia](#), to the east by the Atlantic Ocean, and to the south by the Straits of Florida. Florida is the 22nd-most extensive (65,755 sq mi—170,304 km²), the 3rd-most populous (21,312,211 inhabitants),^{[1][2]} and the 8th-most densely populated (384.3/sq mi—121.0/km²) of the U.S. states. [Jacksonville](#) is the most populous municipality in the state and the largest city by area in the contiguous United States. The [Miami metropolitan area](#) is Florida's most populous urban area. [Tallahassee](#) is the state's capital.

About two-thirds of Florida occupies a peninsula between the [Gulf of Mexico](#) and the [Atlantic Ocean](#). Florida has the longest coastline in the contiguous United States, approximately 1,350 miles (2,170 km), not including the contribution of the many barrier islands. It is the only state that borders both the Gulf of Mexico and the Atlantic Ocean. Much of the state is at or near sea level and is characterized by sedimentary soil. Florida has the lowest high point of any U.S. state. The climate varies from [subtropical](#) in the north to [tropical](#) in the south.^[13] The [American alligator](#), [American crocodile](#), [American flamingo](#), [Florida panther](#), [bottlenose dolphin](#), and [manatee](#) can be found in [Everglades National Park](#) in the southern part of the state. Along with [Hawaii](#), Florida is one of only two states that has a tropical climate, and is the only continental U.S. state with a tropical climate. It is also the only continental U.S. state with a coral reef called the [Florida Reef](#).^[14]

Since the first European contact was made in 1513 by Spanish explorer [Juan Ponce de León](#) – who named it Florida, informally *La Florida* ([la flõ riða] "the land of flowers") upon landing there in the Easter season, *Pascua Florida*^[15] – Florida was a challenge for the European colonial powers before it gained statehood in the United States in 1845. It was a principal location of the [Seminole Wars](#) against the [Native Americans](#), and racial segregation after the [American Civil War](#).

Today, Florida is distinctive for its large Cuban expatriate community and high population growth, as well as for its increasing environmental issues. The state's economy relies mainly on tourism, agriculture, and transportation, which developed in the late 19th century. Florida is also renowned for amusement parks, orange crops, winter vegetables, the [Kennedy Space Center](#), and as a popular destination for retirees.

Florida's close proximity to the ocean influences many aspects of [Florida culture](#) and daily life. Florida is a reflection of influences and multiple inheritance; [African](#), [European](#), [indigenous](#), and [Latino](#) heritages can be found in the architecture and cuisine. Florida has attracted many writers such as [Marjorie Kinnan Rawlings](#), [Ernest Hemingway](#) and [Tennessee Williams](#), and continues to attract celebrities and athletes. It is internationally known for golf, tennis, auto racing and water sports. Several beaches in Florida have turquoise and emerald-colored coastal waters.^[16]

Tallahassee, Florida

From Wikipedia, the free encyclopedia

Coordinates: 30°27'18"N 84°15'12"W

Tallahassee redirects here. For the album, see [Tallahassee \(album\)](#).

Tallahassee /tələˈhæsə/ is the capital of the Southern U.S. state of Florida. It is the county seat and only incorporated municipality in Leon County. Tallahassee became the capital of Florida, then the Florida Territory, in 1824. In 2017, the population was 191,049, making it the 7th-largest city in the U.S. state of Florida, and the 126th-largest city in the United States.^[6] The population of the Tallahassee metropolitan area was 382,627 as of 2017. Tallahassee is the largest city in the Florida Panhandle region, and the main center for trade and agriculture in the Florida Big Bend and Southwest Georgia regions.

Tallahassee is home to Florida State University, ranked the nation's thirty-third best public university by *U.S. News & World Report*.^[7] It is also home to Florida A&M University, the fifth-largest historically black university by total enrollment.^[8] Tallahassee Community College is a large state college that serves mainly as a feeder school to Florida State and Florida A&M. Tallahassee qualifies as a significant college town, with a student population exceeding 70,000.^[citation needed]

As the capital, Tallahassee is the site of the Florida State Capitol, Supreme Court of Florida, Florida Governor's Mansion, and nearly 30 state agency headquarters. The city is also known for its large number of law firms, lobbying organizations, trade associations and professional associations, including the Florida Bar and the Florida Chamber of Commerce.^[9] It is a recognized regional center for scientific research, and home to the National High Magnetic Field Laboratory. In 2015, Tallahassee was awarded the All-American City Award by the National Civic League for the second time. Tallahassee is currently ranked as the 18th-best college town in the nation by *Best College Reviews*.^[10]

List of United States Postal Codes and State Abbreviations

Created: December 17, 2015 *Last Modified: October 07, 2017*

For as long as the states have been around, people have been abbreviating their names. Whether simply for convenience or to comply with the post office's 23-character per line preference in addresses, state abbreviations are widely used.

State Postal Codes are used all the time and many are immediately obvious. FL stands for Florida, CA for California, and TX for Texas. However not every abbreviation is so easy. Does AL stand for Alaska or Alabama? (Spoiler: it's Alabama). What is Louisiana's abbreviation, again? (LO for Louisiana, not LA).

These commonly used abbreviations were standardized in October 1963 by the U.S. Post Office (USPS). Before that, the preferred state abbreviations were mostly 4 letters.

Since 1963, the Post Office has changed only one code. In 1969, Nebraska was changed from NB to NE. This change was done for consistency sake. Most other states' abbreviations are the first two letters of the state unless two states start with the same two letters.

Check the sortable table below for a complete list of the official state Postal Codes and abbreviations.

State	Abbreviation	Postal Code
Alabama	Ala.	AL
Alaska	Alaska	AK
American Samoa		AS
Arizona	Ariz.	AZ
Arkansas	Ark.	AR
California	Calif.	CA
Colorado	Colo.	CO
Connecticut	Conn.	CT

The World Languages

The screenshot shows a Microsoft Edge browser window displaying the CIA World Factbook. The URL is https://www.cia.gov/library/publications/the-world-factbook/fields/2098.html. The page title is "The World Languages". The CIA logo and slogan "THE WORK OF A NATION. THE CENTER OF INTELLIGENCE." are visible. The navigation menu includes HOME, ABOUT CIA, CAREERS & INTERNSHIPS, OFFICES OF CIA, NEWS & INFORMATION, LIBRARY, and KIDS' ZONE. The main content area is titled "THE WORLD FACTBOOK" and features a large image of an open book. A sidebar on the left lists publications like "Center for the Study of Intelligence", "Freedom of Information Act", and "Intelligence Literature". The main content table has columns for "COUNTRY" and "LANGUAGES(%)".

COUNTRY	LANGUAGES(%)
Afghanistan	Afghan Persian or Dari (official) 80% (Dari functions as the lingua franca), Pashto (official) 47%, Uzbek 11%, English 5%, Turkmen 2%, Urdu 2%, Pashayi 1%, Nuristani 1%, Arabic 1%, Balochi, Shugni, Pamiri, Hindi, Russian, German, French < 5% each, don't know/refused <1% note 1: data represent most widely spoken languages; shares sum to more than 100% because there is much bilingualism in the country and because respondents were allowed to select more than one language note 2: the Turkic languages Uzbek and Turkmen, as well as Balochi, Pashayi, Nuristani, and Pamiri are the third official languages in areas where the majority speaks them (2017 est.)
Akrotiri	English, Greek
Albania	Albanian 98.8% (official - derived from Tosk dialect), Greek 0.5%, other 0.6% (including Macedonian, Romani, Vlach, Turkish, Italian, and Serbo-Croatian), unspecified 0.1% (2011 est.)
Algeria	Arabic (official), French (lingua franca), Berber or Tamazight (official); dialects include Kabyle Berber (Taqbaylit), Shawiya Berber (Tacawit), Mzab Berber, Tuareg Berber (Tamahaq)
American Samoa	Samoan 88.6% (closely related to Hawaiian and other Polynesian languages), English 3.9%, Tongan 2.7%, other Pacific islander 3%, other 1.6% note: most people are bilingual (2010 est.)
Andorra	Catalan (official), French, Castilian, Portuguese
Angola	Portuguese 71.2% (official), Umbundu 23%, Kikongo 8.2%, Kimbundo 7.8%, Chokwe 6.5%, Nhaneca 3.4%, Ngangela 3.1%, Fiole 2.4%, Kwanhama 2.3%, Muhumbi 2.1%, Luvale 1%, other 3.6% note: most widely spoken languages; shares sum to more than 100% because some respondents gave more than one answer on the census (2014 est.)
Anguilla	English (official)
Antigua and Barbuda	English (official), Antiguan creole
Argentina	Spanish (official), Italian, English, German, French, Indigenous (Mapudungun, Quechua)

List of countries by GDP (nominal) per capita

From Wikipedia, the free encyclopedia

Not to be confused with List of countries by GDP (PPP) per capita.

The world sorted by their gross domestic product per capita at nominal values. This is the value of all final goods and services produced within a nation in a given year, converted at market exchange rates to current U.S. dollars, divided by the average population for the same year.

The figures presented here do not take into account differences in the cost of living in different countries, and the results vary greatly from one year to another based on fluctuations in the exchange rates of the country's currency. Such fluctuations change a country's ranking from one year to the next, even though they often make little or no difference to the standard of living of its population.

Therefore, these figures should be used with caution. GDP per capita is often considered an indicator of a country's standard of living;^{[2][3]} although this is problematic because GDP per capita is not a measure of personal income.

Comparisons of national income are also frequently made on the basis of purchasing power parity (PPP), to adjust for differences in the cost of living in different countries. (See List of countries by GDP (PPP) per capita.) PPP largely removes the exchange rate problem but not others; it does not reflect the value of economic output in international trade, and it also requires more estimation than GDP per capita. On the whole, PPP per capita figures are more narrowly spread than nominal GDP per capita figures.

Non-sovereign entities (the world, continents, and some dependent territories) and states with limited international recognition (such as Kosovo, the State of Palestine and Taiwan) are included in the list in cases in which they appear in the sources. These economies are not ranked in the charts here, but are listed in sequence by GDP for comparison. They are marked in italics.

Note that the Irish GDP data below is subject to material distortion by the tax planning activities of foreign multinationals in Ireland. 2015 Irish GDP is over 150% of 2015 Irish GNI. To address this, in 2017 the Central Bank of Ireland created "modified GNI" (or GNI*) as a more appropriate statistic, and the OECD and IMF have adopted it for Ireland. 2015 Irish GDP is 143% of 2015 Irish GNI*.

All data are in current United States dollars. Historical data can be found [here](#).

Life Expectancy

by Max Roser [\[cite\]](#)

Life expectancy has increased rapidly since the Enlightenment. Estimates suggest that in a pre-modern, poor world, life expectancy was around 30 years in all regions of the world. In the early 19th century, life expectancy started to increase in the early industrialized countries while it stayed low in the rest of the world. This led to a very high inequality in how health was distributed across the world. Good health in the rich countries and persistently bad health in those countries that remained poor. Over the last decades this global inequality decreased. Countries that not long ago were suffering from bad health are catching up rapidly. Since 1900 the global average life expectancy has more than doubled and is now approaching 70 years. No country in the world has a lower life expectancy than the countries with the highest life expectancy in 1800.

I. Empirical View

I.1 Rising life expectancy around the world

The visualization below shows the dramatic increase in life expectancy over the last few centuries. For the UK – the country for which we have the longest time-series – we see that before the 19th century there was no trend for life expectancy: life expectancy fluctuated between 30 and 40 years.

Over the last 200 years people in all countries in the world achieved impressive progress in health that lead to

Left- and right-hand traffic

From Wikipedia, the free encyclopedia

The terms **right-hand traffic** (RHT) and **left-hand traffic** (LHT) refer to the practice, in **bidirectional traffic**, to keep to the right side or to the left side of the road, respectively. This is so fundamental to traffic flow that it is sometimes referred to as the **rule of the road**.^[1]

RHT is used in 163 countries and territories, with the remaining 78 countries and territories using LHT. Countries that use LHT account for about a sixth of the world's area and a quarter of its roads.^[2] In 1919, 104 of the world's territories were LHT and an equal number were RHT. From 1919 to 1986, 34 of the LHT territories switched to RHT.^[3]

Many of the countries with LHT were formerly part of the British Empire. In addition, Cyprus, Japan, Indonesia, Thailand and other countries have retained the LHT tradition. Conversely, many of the countries with RHT were formerly part of the French colonial empire or, in Europe, were subject to French rule during the Napoleonic conquests.

For rail traffic, LHT predominates in Western Europe (except Spain and the Netherlands), Latin America, and in countries formerly in the British and French Empires, whereas North American and central and eastern European train services operate RHT.

According to the International Regulations for Preventing Collisions at Sea, water traffic is RHT. For aircraft the US Federal Aviation Regulations suggest RHT principles, both in the air and on water.^[4]

In healthy populations, traffic safety is thought to be the same regardless of handedness, although some researchers have speculated that LHT may be safer for ageing populations^[5] since humans are more commonly **right-eye dominant** than left-eye dominant.^[6]

History [edit]

Ancient Greek, Egyptian, and Roman troops kept to the left when marching.^[7] In 1998, archaeologists found a well-preserved double track leading to a Roman quarry near Swindon, in southern England. The grooves in the road on the left side (viewed facing down the track away from the quarry) were much deeper than those on the right side, suggesting LHT, at least at this location, since carts would exit the quarry heavily loaded, and enter it empty.^[8]

The first reference in English law to an order for LHT was in 1756, with regard to London Bridge.^[9]

Some historians, such as C. Northcote Parkinson, believed that ancient travellers on horseback or on foot generally kept to the left, since most people were right-handed. If two men riding on horseback were to start a fight, each

Sex Ratio

Population sex ratio (males per 100 females)

In the human species the ratio between males and females at birth is slightly biased towards the male sex. The natural "sex ratio at birth" is often considered to be around 105. This means that at birth on average, there are 105 males for every 100 females.

Nature provides that the number of newborn males slightly outnumber newborn females because as they grow up, men are at a higher risk of dying than women not only due to sex differentials in natural death rates, but also due to higher risk from external causes (accidents, injuries, violence, war casualties). Thus, the sex ratio of total population is expected to equalize. Instead if a country's population sex ratio does not equalize or rather exceeds* the 105-threshold, it means societies with a dominating preference for male child tend to intervene in nature and reduce the number of born girl child by sex-selective abortion and infanticide.

(*An under-registration of female births also contributes to sex ratios at birth above the natural level).

Because women account for one-half of a country's potential, balanced sex ratio is desirable. Besides, gender imbalances have been known in human history to cause serious negative consequences for the society in the long run.

Situation in SEAR

Over last 20 years (from 1990 to 2010) the ratio of number of males to per 100 females has declined in all SEAR countries except Bhutan, Indonesia, and DPRK. While in Bhutan it increased by eight percentage points, in Indonesia and DPRK the increase was modest by one percent. Sharpest decline was in Sri Lanka, Nepal, Maldives, and Bangladesh in that order. By 2010, only two countries (India and Bhutan) in the Region continue to have skewed (above 105) sex ratio.

On the other hand, of the three countries (DPR Korea, Myanmar, and Thailand) which had higher percentage of females than males, two (Myanmar and Thailand) continued to do so at still higher rate in 2010 but it slowed down in DPR Korea in favor of males.

Although women normally outnumber men beyond age 60, somehow it is not so in three SEAR countries (Bhutan, Maldives, and Bangladesh) where sex ratio in 60+

COUNTRY COMPARISON : DISTRIBUTION OF FAMILY INCOME - GINI INDEX

Distribution of family income - Gini index measures the degree of inequality in the distribution of family income in a country. The more nearly equal a country's income distribution, the lower its Gini index, e.g., a Scandinavian country with an index of 25. The more unequal a country's income distribution, the higher its Gini index, e.g., a Sub-Saharan country with an index of 50. If income were distributed with perfect equality the index would be zero; if income were distributed with perfect inequality, the index would be 100.
